

POWDER COATING & SPRAY PAINTING

Semper Quality Industries has over 30 years' experience providing high quality protective coatings for metal and plastic components.

Our Expertise

Semper Quality Industries uniquely offers both powder coatings and spray coatings. Part preparation can include abrasive blasting, manual spray and phosphate for large parts as well as 3-stage automated cleaning for production requirements.

Our high-efficiency conveyor production line is capable of painting products up to 32" wide x 48" long x 70" high and up to 150 pounds. We also have a large bay coatings booth for parts up to 8' wide x 16' long x 10' high and weighing 5000 pounds.

Custom Services Designed for Your Coating Needs

- Stripping, beading and blasting
- Metal and plastic coatings
- Unique patterns, textures and colors available
- Light assembly
- Packaging and shipping
- ISO-9001:2015

STAINLESS STEEL PASSIVATION

Semper Quality Industry's highly-efficient automated line can passivate your next stainless steel project with fast turn around and competitive pricing.

5 Stage Passivation – AMS2700E (other specs available)

1. Alkaline Cleaning - for removal of all contaminants using detergent cleaners
2. Filtered Water Rinse – rinsing off alkaline cleaner
3. Citric Acid Treatment - immersion bath to fully dissolve any free irons and sulfides for enhancement of the oxide layer
4. Filtered Water Rinse – rinsing off citric acid
5. Filtered Water Rinse – precautionary rinse
6. DI Water Rinse - deionized water avoids water droplet spotting
7. Dry Parts – timed drying for energy efficient operation
8. Test Sample Parts – standard procedure such as copper sulfate testing
